

Seats

A seat is a strong, strong surface to be seated, typically raised above floor level. Typically used by one person, the majority of seats are on the support of four legs, although some may be in a triangular shape with just three legs. A stool is a kind of seat that does not have any arm rests or a back rest. A kind of seat which has folding action and an inclining footrest is referred to as a recliner, whereas a seat along with arms only is considered an arm seat. When a seat has attached wheels, it could be referred to as a wheelseat and if the seat is hung from above, it is referred to as a swing. A permanently connected seat in a theatre or a train is called a seat or airline seat, yet when riding; it is a saddle as in bicycle saddle. A car seat is the type found within vehicles and an infant car seat will be a seat particularly designed for young children.

The design of the seat could differ quite significantly in order to accommodate numerous requirements and aesthetic tastes. As an instance, designs could be decorated with drilled openings, could include low backs or gaps for ventilation or be made of porous materials. The seat back could be designed as an included headrest by means of extending the height above the occupant's head. Seats could be constructed with an attached, built in footrest or come with a separate matching ottoman. An ottoman is a short stool which is designed to be used as a movable footrest. At times the ottoman can be attached to a glider chair with swing arms, permitting the ottoman to rock back and forth together with the glider like a rocking chair together with a built-in footrest.

Seat covers are temporary cloth covers utilized for a seat that could offer protection against wear and add attractiveness. A huge array of seat covers from leather to neoprene are now existing. More formal materials can be rented for occasions like for example weddings to be able to enhance the decoration. Several seat covers have decorative seat ties or bows connected to be tied at the back of the seat in a ribbon or decorative knot. Various folks make use of custom clear plastic furniture covers in order to protect their expensive sofas and seats.

Seat pads provide cushioning for hard seats, even though several are usually decorative. Several could also be used to add to a driver's height in vehicles. In addition, orthopaedic backrests provide lower spine and lumbar support. Various producers have their seat pad designs patented and are recognized by certain medical organizations. Several of the newer car seats accessible are equipped with built-in and adjustable lumbar supports to offer additional ease to riders as well as drivers of the motor vehicle.
