

Aerial Work Platforms

There are different lift truck accessories presented on the market. They can help transform your lift truck so that you can expand your ability to pick stuff up or complete clean up tasks and material handling with less effort.

A few attachments were specially intended for the blades themselves. For instance, fork extensions are utilized whenever you require more fork length, that increases lifting capacity. Blade extensions come in lengths ranging from 48-120 inches. Rounded or triangular attachments are one more kind used when transferring rolled material to be able to make certain it does not roll off of the typical flat blades.

Lifting accessories can be pivoting and telescoping crane attachments. They are available in various styles. These accessories are often utilized for transporting lumber, metal bars, poles or whichever sort of bulky things. Additional accessories like different styles of hooks and hook plates are presented to be able to lift objects making use of a chain or sling. Magnetic lifters and slab lifters are other things which can be utilized together with hook attachments. Slab lifters are specialized attachments that are used for carrying a variety of materials which are delivered in a sheet or slab format. Rug rams or carpet poles are other lifting tools which attach to your lift truck to make transporting rolls of carpet a lot easier. The attachment hooks onto the lift truck's blades and has a pole that goes through the center of the carpet roll.

There are various kinds of forklift accessory designed for facility maintenance like for instance snow forks. These industrial blades could be attached to front end loaders and designed for transferring materials like for example snow, dirt as well as mulch. Other common cleanup accessories consist of standard sweepers and magnetic sweepers. Standard sweepers includes a broom that the forklift forks hook onto for sweeping big spaces like for instance factory floors, parking lots and warehouse. The magnetic sweeper is the same except that it has a magnetic plate instead of bristles. The magnetic sweeper is used in places where there is lots of metal debris like on shop floors for instance. Sweepers have widths as much as sixty inches and this surface area makes clean up easy and quick.

Material spreaders are other attachments used on forklifts. These spreaders are useful for a range of applications like for example spreading fertilizers, insecticides, seeds, ice melt, rock salt and pellets.

Another optional lifting accessory are work platforms. These can be utilized by a lot of various companies on a daily basis. Platforms may range in size from 36" x 36" to up to 60" x 60". Some units may be available and are capable of folding up and storing into a smaller place. Work platforms are designed to raise staff up to an overhead location using the lift truck. Larger platform models have additional space for staff in order to bring tools and other essential objects intended for the job. Usually work platforms are constructed of poly material or steel.
